DETAILED ACTION

1. Applicant's amendment filed 8/28/06 has been entered.

Claim Objections

2. Claims 4-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only, and/or, depend from any other multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Allowable Subject Matter

3. Claims 1-3, 9 and 10 are allowed over the prior art of record.

Reasons For Allowance

4. The following is an examiner's statement of reasons for allowance: The prior art does not disclose nor fairly suggest a semiconductor device and the method of manufacturing a semiconductor device as described in independent claims 1 and 9.

The semiconductor body has an inclusion of a localized region close to the channel-accommodating region which provides low resistance paths to encourage lateral current spreading when the device is turned on. Furthermore, the average doping of the stripes will govern the breakdown voltage of the localized region. Thus, owing to the presence of the stripes of the second conductivity type, the stripes of the first conductivity type can provide low resistance paths relative to the drain drift region without a commensurate decrease in the breakdown voltage of the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
